

## FAQs - Composing in 4DSOUND

### **Do I Need Prior Experience in Music Production to Enroll?**

Yes, basic experience in music production is necessary. Proficiency in using Ableton is also essential. We encourage you to start observing how you naturally perceive spatial sound in your environment and consider how these perceptions can influence your compositions.

### **Will There Be Courses for Beginners in the Future?**

Absolutely. We are planning to offer introductory masterclasses on spatial sound. These classes will delve deeper into the theoretical aspects and the concept of embodied listening, catering to those new to this field.

### **How Will This Workshop Concretely Benefit My Work?**

Participants gain a one-year license to the 4DSOUND software, with an option to extend. This access allows you to independently create and refine 4DSOUND pieces, preparing you for a potential residency at MONOM. We will announce further training opportunities, which will ultimately lead to the possibility of becoming a certified 4DSOUND engineer. This workshop is an excellent starting point for your 4DSOUND career, whether you aspire to be a spatial sound engineer or a 4DSOUND artist.

### **Can I Use the 4DSOUND License for Commercial Purposes?**

The license is available only for R&D purposes. If you are interested in using the license for commercial purposes, please contact the MONOM team.

### **Are Scholarships or Discounts Available?**

Yes, we are offering four scholarships, each covering 50% of the course fee, specifically designed for low-income earners. To apply, please submit your application by January 15th. Your application should include a brief statement detailing your motivation to join the course, your CV, and an explanation of your need for the scholarship. Decisions will be based on the applicants' demonstrated financial need.

Scholarship recipients will be announced on January 18th.

We prioritize these scholarships for individuals from economically disadvantaged backgrounds and underrepresented communities in the field of spatial sound.

### **What Does the fee Cover?**

Your investment includes all course materials and participation in the training sessions. Please note, it does not cover personal expenses such as travel, accommodation, meals, or personal laptops.
